BRAD WILLIAMS

Director of Building Hydraulics.

Brad joined Sellick Consultants in 2009 and brings to the Company an established reputation in the industry that has enabled for Sellick Consultants to undertake more complex projects in addition to the wide range of varied projects the company also undertakes in the Building Hydraulics discipline.

Brad is responsible for building services design, documentation and supervision for all projects at Sellick Consultants. Project design management functions and reviews to ensure buildability and functionality of the designs and the realisation of project objectives.

Duties Include:

- Business strategic planning
- Research and development into innovative and sustainable design outcomes
- Collaboration with world leading academics to deliver alternative solutions to key projects
- Growing the business into new emerging markets that seek innovative design outcomes
- Ongoing co-ordination with other disciplines to ensure company objectives are obtained for multi discipline projects
- Acting ethically and professionally in the manner expected by industry standards

Relevant Experience

2004 – 2008: Discipline Leader, Building Hydraulics
Brad was Group Discipline Leader for Building Hydraulics for Cardno Limited.

1990 – 2003: Manager, Building Hydraulics
Brad was responsible for the Building Hydraulics Discipline within Young Consulting Engineers, now Cardno Young.

1987 – 1989: Manager, Building Hydraulics
Brad was responsible for the Building Hydraulics Discipline within the ACT Office of Rankine & Hill Consulting Engineers, now Aurecon.
