BRAD WILLIAMS

Lead Designer of Building Hydraulics.

Brad joined Sellick Consultants in 2009 and brought to the Company an established reputation in the industry that has enabled Sellick Consultants to undertake more complex projects in addition to the wide range of varied projects the company also undertakes in the Building Hydraulics discipline.

Brad is now responsible for building hydraulic services design and peer review for selected projects at Sellick Consultants. Project design reviews to ensure buildability and functionality of the designs and the realisation of project objectives.

Duties Include:

- Design implementation
- Peer review of internal designs
- Mentoring and supporting the Hydraulics team
- Research and development into innovative and sustainable design outcomes
- Collaboration with world leading academics to deliver alternative solutions to key projects
- Growing the business into new emerging markets that seek innovative design outcomes
- Ongoing co-ordination with other disciplines to ensure company objectives are obtained for multi discipline projects
- Acting ethically and professionally in the manner expected by industry standards

Relevant Experience

2005 – 2021: Director, Building Hydraulics
Brad retired as a Director of Sellick Consultants on 30 June 2021.

2004 – 2008: Discipline Leader, Building Hydraulics
Brad was Group Discipline Leader for Building Hydraulics for Cardno Limited.
