DARREN SAULT

Structural Commercial Manager

Darren has joined Sellick Consultants to head up their Commercial Structures Division. Graduating from The University of Newcastle with First Class Honours and the Dean's Medal in 1998, Darren has 15 years of experience primarily in the Canberra region, specialising in major commercial developments. As well as project planning skills, Darren has high level analysis (linear and non-linear) skills, which result in more efficient and economic structural design. Darren has worked on a wide variety of different projects, structural systems, and client requirements in a considerable 15 year career thus far. It shows his ability to adapt to different client and building performance requirements, and still produce innovative and cost effective structural design solutions of a consistently high quality.
