DON MCINNES

### **Managing Director and Principal Engineer overseeing Structural Section.**

Don joined Sellick Consultants in 1983 as a Cadet Engineer, progressing to Engineering Manager upon completion of his Bachelor of Civil Engineering at UNSW. Don then went onto become the Managing Director of the Company in 1991, overseeing the company's growth to a current staff number in excess of 30. Don has more than 25 years' experience in structural engineering and has built a reputation throughout his career for helping private and public sector clients meet their project goals. His structural engineering experience is extensive and covers timber, steel, concrete, composite and precast structures. With a focus on varying levels of residential, commercial and industrial developments, Don assesses and then formulates economic yet optimum solutions for clients.
