CARL SOMMERVILLE

Director – Building Hydraulics Discipline Manager

Carl joined Sellick Consultants in February 2015 and brings over 20 years' experience in the building industry from both a trade and engineering level, allowing him to have a solid understanding and appreciation of the processes involved to manage a project from beginning to end.

The level of experience and knowledge that Carl has from both a hands on point of view and lead design/project management level are a valuable asset to his growing relationships with new and existing clients as well as his close relationships with numerous tier 1 hydraulic contractors in the Canberra Region.

One of Carl's main objectives in his role is to provide a service specific to each individual client's needs and budget whilst walking them through ideal solutions/designs that are tailored to each and every project.
