CARL SOMMERVILLE

Director | Building Hydraulics Discipline Manager

Carl joined Sellick Consultants in February 2015 and has over 25 years' experience in the building and plumbing industry with a background as a licensed plumber, qualified builder, and hydraulic consultant.

Carl's extensive experience provides him with a unique perspective on projects. His ability to approach projects from both a hands-on and strategic consultant/project management perspective allows him to provide well-rounded, efficient, and highly detailed solutions. This makes him an invaluable asset to any project.

Widely respected within the Canberra construction and engineering community, Carl has cultivated strong working relationships with numerous Tier 1 hydraulic contractors and multiple well known developers and builders. His reputation for reliability, technical expertise, and collaborative approach has earned him a trusted position within the industry.

Carl's strengths lie within detailed reporting, with a specialisation in roof audits, drainage design, and water ingress investigations. He has been involved in numerous high-profile and complex projects and has been preparing building reports of this nature for over 14 years. Over the last six years, he has been providing expert specialised roof drainage performance solutions.

In addition to Carl's practical experience, he holds a Master of Engineering Management and is a registered Design practitioner and serves as the ACT Director of the Hydraulic Consultants Association Australasia (HCAA). Carl's core objective is to deliver services that are specifically tailored to each client's individual needs and budget, ensuring the most effective solution and design approaches, resulting in each project being both practical and customised.

In his capacity as Company Director and Director of the HCAA, Carl plays an active role in the ACT Plumbing Industry workshops and maintains ongoing engagement with the ACT Master Plumbers Association, contributing to industry standards and professional development initiatives.
